

GUARDIAN DOME D-LOCK

The Guardian Dome-D-Lock™ is designed to withstand the ultimate abuse in high volume restaurants. Put an end to rags and other floating debris entering and clogging the drain lines.

No more damaged P-Traps due to repeated drain clearing by a plumber's snake. This incredibly durable drain lock is constructed of a glass filled polypropylene base, cast aluminum dome top, brass nut, and a tamper proof pin-n-head stainless steel bolt. It doesn't require assembly, training, or a plumber to install. Simply insert the Dome-D-Lock™ into the floor sink drain, and tighten the Torx tamperproof bolt with a ratchet. Install time is as quick as 10 seconds. Available in 2", 3" and 4" sizes. Save money on repair bills and keep your kitchen running smoothly with The Guardian Dome-D-Lock™!

- **Floor Sink Dome Drain Lock**
- **Prevents debris from entering drain lines**
- **Allows water to flow despite debris build-up in sink**
- **Locks using a tamper proof torx bolt**
- **Easy to install - no assembly required**
